

## **ONSHORE/OFFSHORE APPLICATION ASSESSMENT PROCESS AND TOOL**

### **Abstract of the Disclosure**

A method for assessing and managing a plurality of software applications for offshore migration. An application assessment score is computed for each application. A delivery model is selected for each of said applications. The delivery model is an onshore model, an offshore model, or an onshore-offshore mode. The delivery model is selected as function of the application assessment score. The method may be implemented using a computer program product that includes a computer usable medium having a computer readable program code embodied therein. The computer readable program code is adapted to execute the steps of the method.
